Tina,

We have a White 2019 Ecosport, the smallest of the SUVs for \$22,272. It has just under 43,000 miles on it. Right now the used market is pretty slim picking. The prices of used are so high that buying new with the government pricing is the best bang for the buck.

They will start building 2023s in November, so even if you order now it would likely be after the first of the year before it arrives.

Thanks Shawn.

Do you happen to know if you have anything in your used inventory, in white , that would be similar and meet our needs?

Thanks!

Tina
